INFORMATION ABOUT REACH & ROHS 3 registration substances (SVHC)

Trade Name:

- **RECREUS PETG**

The products mentioned above supplied by RECREU, has integrated the requirements of the European Chemicals Regulation REACH according with Regulation (EC) No 1907/2006 of the European Parliament and of the Council on the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) into their processes, and is fully aware in REACH activities.

A full overview of all substances handled in the company was compiled, and these substances were scrutinized regarding their relevance under REACH.

RECREUS as a downstream user in the supply chain, furthermore confirms that has followed Cefic advice to “double pre-register” all monomers used in polymers (according to REACH qualifying conditions).

Polymers themselves according to Title I, Chapter 1, Article 2 (9), Titles II (registration of substances) and VI (Evaluation) are currently exempt from REACH Registration and Evaluation.

Based on the information available to us from our raw material suppliers, we confirm that, to the best of our knowledge, all of their main suppliers have registered their substances (monomers and additives) in accordance with REACH requirements. Furthermore, to the best of our current knowledge and based on our production processes and raw materials used, no substances of very high concern (SVHC) listed in Annex I, no substances subject to authorization listed in Annex XIV, and no restricted substances listed in Annex XVII are expected to be present in our products in concentrations above 0.1%.

RECREUS checks periodically the update of all the substances lists published on ECHA web: SVHC (last updated January 16th, 2020), according with article 59(10) of REACH regulation 1907/2006, authorization list (last update December 18th, 2017) and restricted substances list (last update October 17th, 2018). We are in permanent communication with our raw materials suppliers.

Directive 2011/65/EU (formerly 2002/95/EC, amended by 2015/863) on the restriction of the use of certain hazardous substances in electrical and electronic equipment

In RoHS Annex II restricted substances (Lead, Mercury, Cadmium, Hexavalent Chromium, Polybrominated biphenyls and Polybrominated diphenyl ethers (PBDE)) and maximum concentration values tolerated by weight in homogeneous materials are reported.

Directive (EU) 2011/65 of 8 June 2011:

- Lead (Pb)
- Mercury (Hg)
- Cadmium (Cd)
- Hexavalent Chromium: (Cr VI)
- Polybrominated Biphenyls (PBB)
- Polybrominated Diphenyl Ethers (PBDE)

Delegate Directive 2015/863/EU, during the periodic revision of the Annex II, has introduced restrictions adding the following substances:

- Bis(2-ethylhexyl) phthalate (DEHP)
- Butyl benzyl phthalate (BBP)
- Dibutyl phthalate (DBP)
- Diisobutyl phthalate (DIBP).

These further restrictions have fully entered into force on 22nd July 2019.
